Customer Testimonials

“We want you to know how pleased we are with the outstanding service you have given us. We appreciate your responsiveness and the way ClearWater Tech conducts business. The EcoTex Laundry Ozone System is quality equipment and easy to maintain. Your staff, particularly Marc DeBrum, is very knowledgeable, efficient, and courteous.”

“We are very happy with the EcoTex Laundry System that we installed at our hotel. In just two weeks we noticed savings in water and gas, and used less chemicals. Our customers have noticed a change in our linens. They are softer and smell fresher. Thank you ClearWater Tech!”

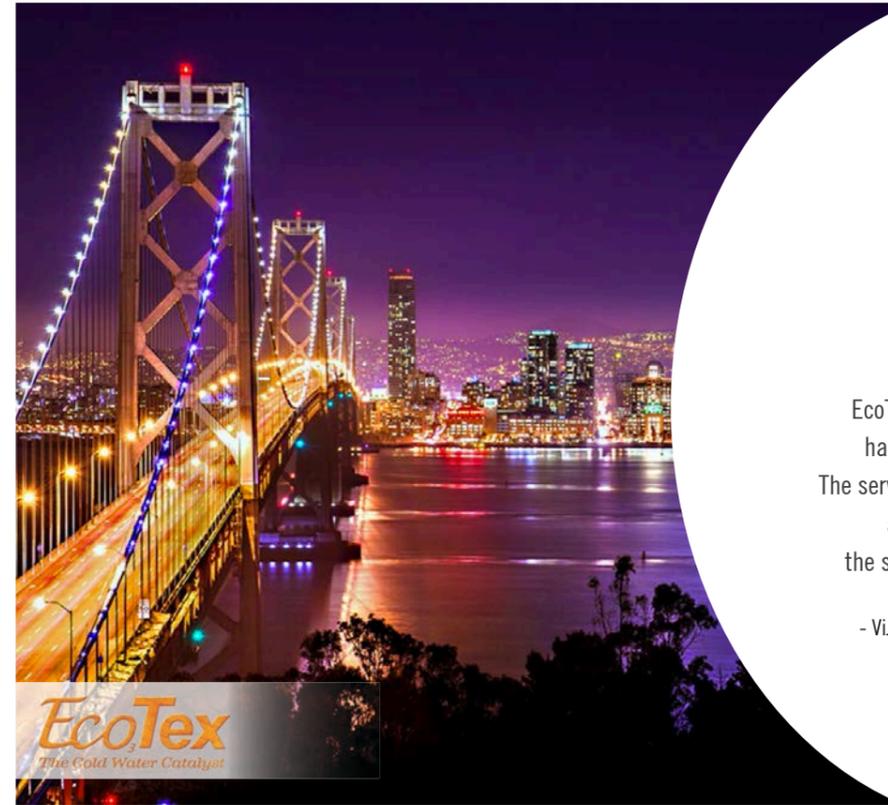

- Tuan Nguyen, Chief Engineer
Marriott Courtyard, Rancho Cordova, CA

“The advantage of using ozone was apparent at the start of operations. It reduced chemical and energy costs to both washers and dryers. The linen and “personals” come out of the dryers softer and fresher smelling, and the reduction of worn out linen is so dramatic we had to acquire wash cloths instead of tearing up our deteriorated inventory. Most noticeable is the reliability of the EcoTex equipment to deliver ozone day in and day out with very little maintenance.”

- Tom Heavin, Fox Run Manor, Findlay, OH

“We have been using the EcoTex System for some time now and have had great results with the ozone system. The service and support from ClearWater Tech has also been beneficial in making sure the system is operating at its optimal level.”

- ViJay Patel, Owner, Millwood Suites, Millbrae, CA

The U.S. Department of Energy commissioned a report to evaluate energy efficient technologies within the On-Premise-Laundry Market (OPL).

After consideration of several alternative technologies, the department selected “Ozone” as the research subject for the report.

The study proved the validity of EcoTex Advanced Technology for a quick return-on-investment, energy and water efficiency, and customer satisfaction”.

- U.S. Department of Energy

“We have a long term care facility with many incontinence concerns. The EcoTex Ozone System has drastically reduced odors from our resident’s clothing, improving our laundry output.

Delicate skin and reactive to detergents is another challenge remedied by the EcoTex System.

The ozone process leaves the linens and clothing softer, brighter, and fresher smelling. We use less added softeners and detergents which has reduced our costs on chemicals, as well as, a decreased rewash step. It’s a greener choice for a daily chore.”

- M. Yvonne Coleman
Highlands-Cashiers Hospital & Eckerd Living Center, Highlands, NC

“Our customers have truly endorsed the EcoTex Ozone System. We have significantly reduced operating costs and experienced our laundry rooms operating more efficiently with reduced hot water consumption.”

- Dean Anderson, General Manager, Hyatt Palm Springs, CA

“We service nearly 1.2 million pounds of total laundry a year, that’s nine pounds per resident. Since installing the EcoTex Ozone Laundry System, we have significantly reduced utility costs and other expenses.

EcoTex also combats superbugs including *MRSA* and *C. Difficile* that can quickly spread in senior facilities.

The very first day we noticed the rooms smelled so much fresher. It provided a brighter, more cheerful working environment.”

- Mario Gugliotta, Facility Manager
Shepherd Village, Toronto, Canada

“The ClearWater representatives thoroughly covered how the process worked, how the installation would proceed, and how much money I would start to save, primarily in gas for hot water. Right away, I could see savings on my statements with the number of therms in daily usage. My overall daily usage gas therms have actually decreased even though our overall occupancy rate has risen.

The most amazing part of all this is that there is no upfront cost at all. Usually going green means there are some costs associated or rebates which must be budgeted or waited for. With this program, your savings pay for the equipment and once that is paid off, the savings are 100% yours. It’s a win-win situation for everyone.”

- Amar Sohi, General Manager, Holiday Inn Express & Suites, Atascadero, CA

“We’d like to share our success and great satisfaction with our EcoTex Ozone System provided and installed by Lapsco, a distributor of ClearWater Tech.

Since the installation of our system, we are proud to consider ourselves eco-friendly. We have reduced our chemical, natural gas, and electricity usage. Our linens have a clean, fresh smell and have a sustained linen life up to 10%. Our clients are very happy.

The system has been such a great asset to our new state of the art commercial processing plant, that we are proud to promote all its benefits in our marketing materials.”

- Rick Mercer, COO, Riteway Linen Services, Port St. Lucie, FL

“Some of our customers have told us our linens smell fresher and are softer, and some have even phoned the laundry room to ask what we wash our laundry with? We are an indoor water park and wash roughly 10k towels a day among thousands of other linens. Since installing EcoTex, our rewash has come down at least 75%, with shorter wash and dryer times. Washing in cold water, we went from a hot environment to a cooler one, so our employees are much happier and labor efficiency has increased.”

- Terry Cook, Laundry Manager
Great Wolf Lodge Resort, WI

“Our customers have truly endorsed the EcoTex Ozone system. They have significantly reduced operating costs and experienced their laundry rooms operating more efficiently with reduced hot water consumption.

Our customers have also experienced extended linen life, whiter whites, fluffier and fresher linens, improved working conditions with more comfortable laundry room temperatures, and a clean smelling environment, not to mention a quick return on their investment!

This is an excellent green product for any commercial laundry room.”

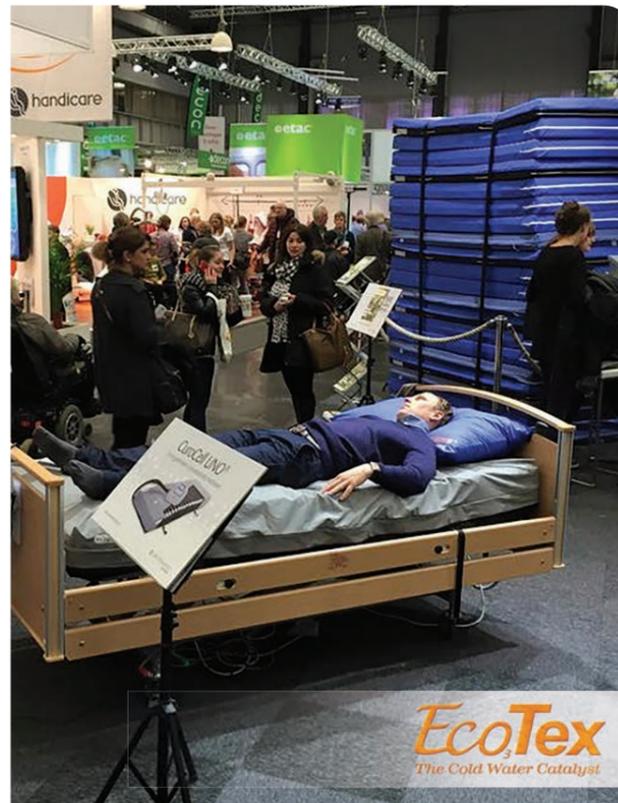

- Mike Pilolli, Vice President, Operations & Commercial Laundry
Coinamatic Commercial Laundry, Canada

“With the EcoTex Ozone Laundry System in our facility, we feel that we are at the forefront of bacterial sanitation for our healthcare related products.

We have reduced the use of chemicals, and by that, have reduced our emissions. The facility smells better, and we feel good about our staff now working in a cleaner environment.”

- Tommy Turpelne, Product Manager, Anne Lindeborg,
Production & Training Manager
Care of Sweden AB, Tranemo, Sweden

“The savings are staggering. When we added ozone to the on-premise laundry, we saved energy, our wash quality improved, and the ozone ensured a superior microbe kill rate.”

- Tom Schmidt, Director of Administration Facilities Management,
Design & Construction
Central Missouri Correctional Center

“We have been partners with ClearWater Tech since 2008, and it’s one of the best supplier relationships we have. Their team supports us in every possible way from marketing collateral and sales tools, to product engineering support. Most impressive is their ozone technology is firmly backed by scientific research.”

- Jay Dixon, President
Equipment for the Laundry and Dry Cleaning Industry
Texchine Incorporated, Chapin, SC

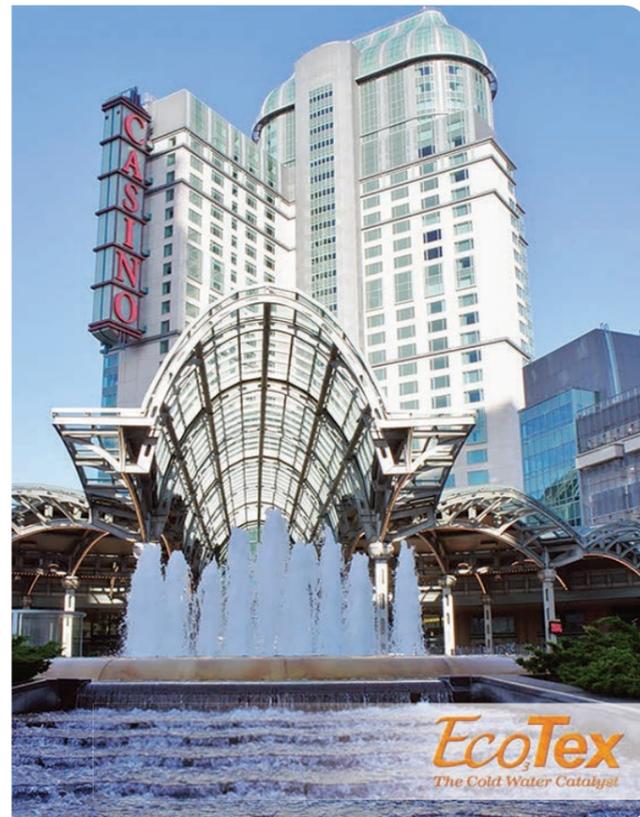

CaroMont Health

“Since installing the EcoTex Ozone System, we have saved \$45k per year in utility costs, as well as reducing our water consumption by over a million gallons per year. Our linen is cleaner and brighter than ever, and we have lowered our rewash rate by 1.5%. Our return on investment is just over one year.”

- James Magnanti, Laundry & Linen Manager
CaroMont Health, Gastonia, NC

“We’ve have decreased our water usage by 75% with savings of 100k a year. The working environment is comfortable for our employees. We feel that we have one of the greenest laundries in Ontario, and we intend on keeping it that way.”

- Harry Davidson, Laundry Services Manager
Niagara FallsView Casino Resort, Ontario

“When our old ozone machine failed, I contacted ClearWater Tech - the best call I ever made.

Adding an EcoTex System brought our laundry costs down, and has worked perfectly. ClearWater Tech has simplified the ozone process so there is minimal maintenance.

Between switching to EcoTex and using Ecolab for our laundry chemicals, our linens, towels, bed sheets, pillow cases, table cloths, napkins, and chefs jackets come out whiter, cleaner, and smell fresher. I would recommend ClearWater Tech to anyone that is in need of an ozone generator.”

- Troy Simao, Facility Maintenance Manager
Vintners Inn, Santa Rosa, CA
