

INDOOR AIR QUALITY NOTABLE INSTALLATIONS

The U.S. Environmental Protection Agency (EPA) says that poor indoor air quality is one of our biggest environmental health concerns. They estimate that the air you breathe inside your home is typically 4 to 40 times worse than the air outside. And most of us spend over 90% of our time indoors.

ClearWater Tech offers a variety of air treatment systems for commercial and residential applications that can reduce many of these indoor pollutants. You will enjoy cleaner, fresher smelling air inside your home or business.
