- Freshens stale air
- Timer controlled for unoccupied operation

FEATURES

- Light Weight
- Timer controlled - constant "On" or 0-60 minutes
- Portable
- 30 CFM Fan

ZAP - ROOM AIR PURIFIER

The ZAP is a high-powered room air purifier designed to eliminate offending odors in a non-occupied space. It is equipped with an elapsed timer switch, which may be set for a desired time from 0-60 minutes or set to a constant 'ON' position. Internal to the ZAP is a 30 CFM fan and two ultraviolet (UV) ozone lamps.

Designed to achieve high levels of ozone concentration within an area and is not to be used in the presence of people or animals.

The ZAP runs on standard 110 VAC main power. Set the timer to the 'OFF' position then plug the unit into main power. It is recommended that the unit be placed in the middle of the room. Close all windows and doorways to the room allowing for a single exit after starting the unit. Set the timer to the desired length of time or to the 'ON' setting. As soon as the timer is moved into position the internal fan and ozone will begin operation.

ZAP SPECIFICATIONS
